Real Estate CRM — Complete User Flow

Derived from: *Real Estate CRM Detailed PRD (v1)*

Purpose: *Map every role, screen, navigation path, decision point, and action implied by the PRD into a single, implementable user-flow reference.*

---

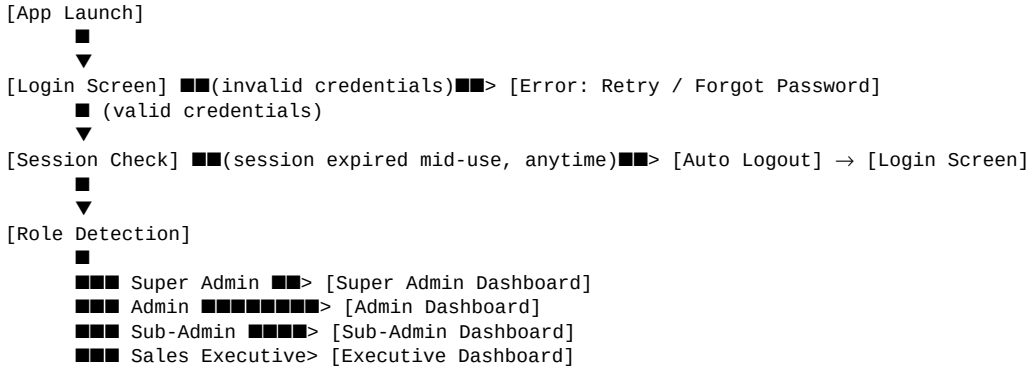
1. Roles & Access Summary

Role	Scope
Super Admin (Platform Owner)	Owns the CRM platform itself; onboards and manages Firms (each represented by an Admin account), plus global reports, settings, permissions. Builders/projects across firms are view-only (name only, no add/edit/delete)
Admin (Firm Owner)	Owns a single Firm/tenant on the platform (onboarded by the Super Admin); creates Sub-Admins, views revenue, adds builders/projects, branch reports, views all client history within their Firm
Sub-Admin	Employee management, lead assignment, customer monitoring, attendance review, visits — scoped to their Firm
Sales Executive	Assigned customers, follow-ups, visits, bookings, notes, daily tasks — scoped to their Firm

Navigation, screens, and available actions are gated by these roles per the "Permission-based UI visibility" requirement (Section 14).

---

2. Global Flow — Entry Point (All Roles)



Decision points

- Invalid login → show error, allow retry or password reset.
- Forgot Password → OTP/email verification → reset → return to Login.
- Session timeout (Security Requirement) → force logout from any screen.
- Disabled/inactive account → block login, show "contact admin" message.

---

3. Super Admin Flow (Platform Owner)

The Super Admin operates one level above individual firms — this is the platform vendor, onboarding and managing each **Firm** (a tenant, represented by an Admin account) that the CRM is sold/licensed to.

3.1 Screens

- Super Admin Dashboard (global KPIs across all firms)
- Firm / Admin Management (List / Add / Edit / Deactivate) — onboarding new firms onto the platform
- Builder List (view-only across firms — name only, no add/edit/delete)
- Project List (view-only across firms — name only, no add/edit/delete)
- Global Reports & Analytics
- Permissions & Role Settings
- Audit Logs
- System Settings

3.2 Flow

```
[Super Admin Dashboard]
   ■■■> [Builder List] (view-only)
   ■        ■■■> View builder name(s) — no add, edit, or delete actions available
   ■
   ■■■> [Project List] (view-only)
   ■        ■■■> View project name(s) — no add, edit, or delete actions available
   ■
   ■■■> [Firm / Admin Management]
   ■        ■■■> Onboard New Firm ■■> Create Admin account ■■> Assign plan/branch/region ■■> Set permissions ■■> Save
   ■        ■■■> Edit Firm / Admin
   ■        ■■■> Deactivate Firm / Admin ■■(decision: active sub-admins/leads under them?)■■> Reassign flow
   ■
   ■■■> [Permissions & Role Settings]
   ■        ■■■> Define UI/module visibility per role ■■> Save ■■> Applies platform-wide
   ■
   ■■■> [Global Reports & Analytics] (see Section 8)
   ■
   ■■■> [Audit Logs]
   ■        ■■■> Filter by user / module / date ■■> View action trail
   ■
   ■■■> [System Settings]
            ■■■> Session timeout config, notification templates, general config
```

---

4. Admin Flow (Firm Owner)

The Admin represents the owner of a single Firm/tenant, onboarded onto the platform by the Super Admin. All data, staff, and reports in this flow are scoped to that Firm.

4.1 Screens

- Admin Dashboard (branch/region KPIs, revenue) — scoped to the Admin's Firm
- Sub-Admin Management (List / Add / Edit / Deactivate)
- Builder & Project Addition (scoped)
- Branch Reports
- All Clients / Customer History (read + limited actions)

4.2 Flow

```
[Admin Dashboard]
   ■■■> [Revenue Overview]
   ■
   ■■■> [Sub-Admin Management]
   ■        ■■■> Create Sub-Admin ■■> Assign branch/team ■■> Save
   ■        ■■■> Edit Sub-Admin
   ■        ■■■> Deactivate Sub-Admin ■■(decision: active leads assigned to their team?)■■■
   ■                                        ■■■ Yes ■■> Trigger reassignment flow (Edge Case §15)
   ■                                        ■■■ No ■■■> Deactivate confirmed
   ■
   ■■■> [Add Builder / Project] (same sub-flow as Super Admin, scoped to Admin's branch)
   ■
   ■■■> [Branch Reports] ■■> Filter by branch/date/executive ■■> Export
   ■
   ■■■> [All Clients History]
            ■■■> Search/filter customers ■■> Open [Customer 360° Profile] (read-heavy, see §6)
```

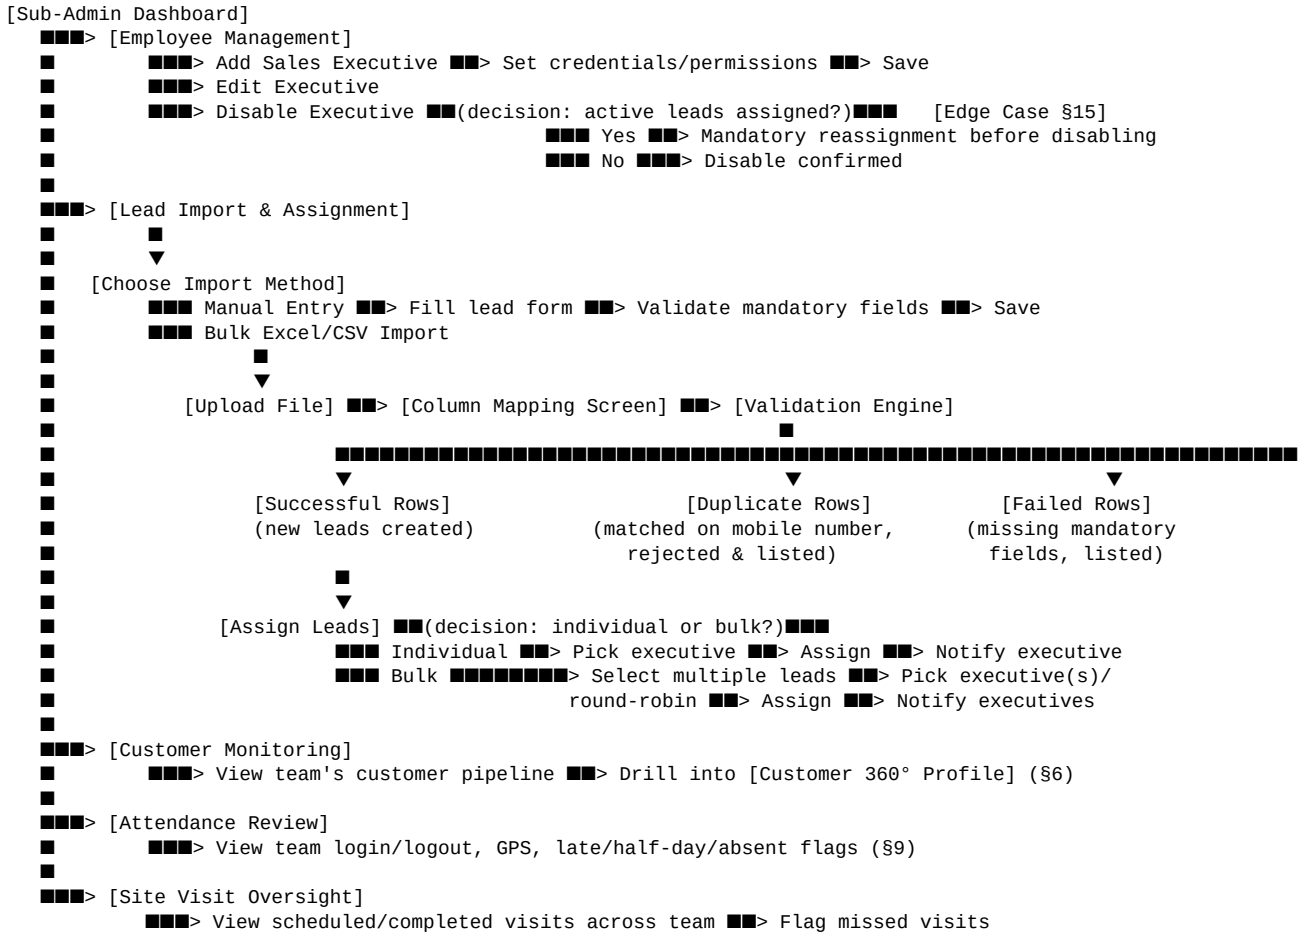
---

5. Sub-Admin Flow

5.1 Screens

- Sub-Admin Dashboard (team KPIs, overdue follow-ups, attendance summary)
- Employee Management (List / Add / Edit / Deactivate Sales Executives)
- Lead Import & Assignment
- Customer Monitoring (team-wide customer view)
- Attendance Review
- Site Visit Oversight

5.2 Flow



6. Sales Executive Flow

6.1 Screens

- Executive Dashboard (assigned leads, today's tasks, overdue follow-ups)
- My Customers (assigned list)
- Customer 360° Profile
- Follow-up Management
- Site Visit Management
- Booking Workflow
- Attendance / Check-in

6.2 Flow

```
[Executive Dashboard]
   ■
   ■■■> [Notification: New Lead Assigned] ■■> Open lead ■■> Begins in "New" status
   ■
   ■■■> [My Customers List] ■■(filter: New / In Progress / Follow-up Due / Booked / Lost)
   ■        ■
   ■        ▼
   ■   [Open Customer 360° Profile]
   ■        ■■■ Personal Info
   ■        ■■■ Communication Timeline
   ■        ■■■ Call Notes ■■> Add new note
   ■        ■■■ Meeting History
   ■        ■■■ Site Visit History
   ■        ■■■ Interested Projects ■■(decision: multiple projects?)■■> Tag multiple interests (Edge Case §15)
   ■        ■■■ Uploaded Documents ■■> Upload/view files
   ■        ■■■ Booking History
   ■        ■■■ Payment Milestones
   ■        ■■■ Activity Timeline (auto-generated log of all actions)
   ■
   ■■■> [Follow-up Management]
   ■        ■
   ■        ▼
   ■   [Schedule Follow-up] ■■> Set date/time, priority, interest level, notes ■■> Save
   ■        ■
   ■        ▼
   ■   [Follow-up Due] (surfaced on Dashboard when due/overdue)
   ■        ■
   ■        ▼
   ■   [Take Action] ■■(decision)■■■
   ■        ■■■ Mark Completed ■■> Log outcome notes
   ■        ■■■ Mark Missed ■■> Triggers "Missed Follow-up Alert" notification to Sub-Admin
   ■        ■■■ Reschedule ■■> Pick new date/time ■■> Save
   ■
   ■■■> [Site Visit Management]
   ■        ■
   ■        ▼
   ■   [Create Visit] ■■> Assign project ■■> Set date/time ■■> Save ■■> Triggers visit reminder
```

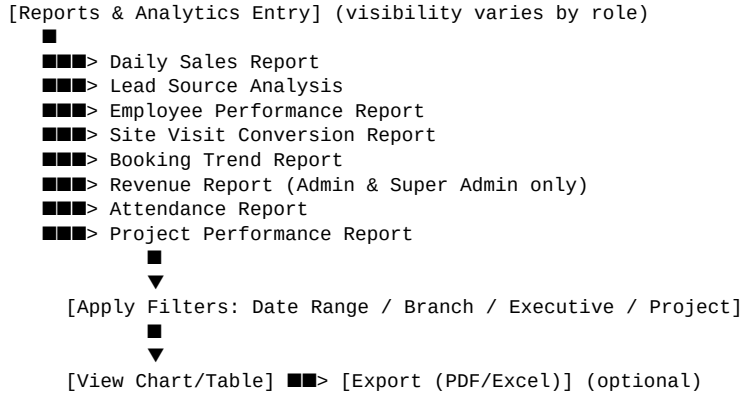
[Visit Day] ■■(decision)■■■
■■■ Conducted ■■> Capture outcome ■■> Upload photos (if required) ■■> Add remarks
■■■ Reschedule ■■> Provide reason ■■> New date/time
■■■ Cancel ■■> Provide reason ■■> Visit closed
■■■> [Booking Workflow]
[Start Booking] ■■> Select Customer + Project ■■> Select Unit/Inventory
[Inventory Check] ■■(decision: unit already booked?)■■■
■■■ Yes ■■> BLOCK — "Unit already reserved" (double-booking prevention, §10 critical rule)
■■■ No ■■■> Proceed
[Capture Booking Amount] ■■> [Select Payment Mode] ■■> [Upload Agreement Documents]
[Update Booking Status] (Reserved → Confirmed → Cancelled, etc.)
[Booking Completed] ■■> Notification sent (executive, Sub-Admin, Admin)
Customer profile updated: Booking History + Payment Milestones
■■■> [Attendance / Check-in]
[Login (Day Start)] ■■> Capture time + GPS location (optional validation)
[Field Activity] (visits, meetings — location tracked if enabled)
[Logout (Day End)] ■■> Capture time ■■> System computes working duration
[Auto-Classification] ■■(decision)■■■
■■■ On-time / Full day
■■■ Late arrival (per threshold)
■■■ Half-day (per threshold)
■■■ Absent (no login recorded)

7. Cross-Cutting Decision Points (Edge Cases, Section 15)

Trigger	Decision	Resulting Flow
Disabling an employee with active leads	Are leads still open?	Force mandatory reassignment before disable completes
Importing leads	Does mobile number already exist?	Route to "Duplicate" bucket instead of creating new record
Customer shows interest in multiple projects	Single or multi-project interest?	Allow tagging multiple "Interested Projects" on one profile
Archiving a project with historical customers	Are past customers linked?	Keep project as read-only reference; do not hard-delete
Executive attempts unauthorized edit	Does role have permission?	Block action at UI level + log attempt in Audit Log
Re-engaging a previously "Lost" customer	Reopen as new opportunity?	Create new opportunity linked to same customer profile, preserving history
Booking an already-reserved unit	Is inventory available?	Hard block — cannot proceed (critical rule, §10)

---

8. Reports & Dashboards Flow (Role-Scoped)



- **Super Admin (Platform Owner):** sees all reports across all firms/branches.
- **Admin (Firm Owner):** sees branch/region-scoped reports + revenue, within their own Firm.
- **Sub-Admin:** sees team-level performance and attendance, within their Firm.
- **Sales Executive:** sees only personal performance stats (implied by role scope).

---

9. Notification Flow (System-Triggered, All Roles)

```
[Trigger Event]
   ■■■ New lead assigned ■■■■■■■■■■■■> Notify assigned Executive
   ■■■ Follow-up due soon ■■■■■■■■■■■> Notify Executive (Dashboard + push/alert)
   ■■■ Follow-up missed ■■■■■■■■■■■■■> Notify Executive + escalate to Sub-Admin
   ■■■ Site visit reminder ■■■■■■■■■■> Notify Executive
   ■■■ Booking completed ■■■■■■■■■■■■> Notify Executive, Sub-Admin, Admin
   ■■■ Employee login/logout ■■■■■■■■> Logged for Sub-Admin/Admin visibility
   ■■■ Unauthorized action attempt ■> Logged to Audit Log, visible to Super Admin/Admin
```

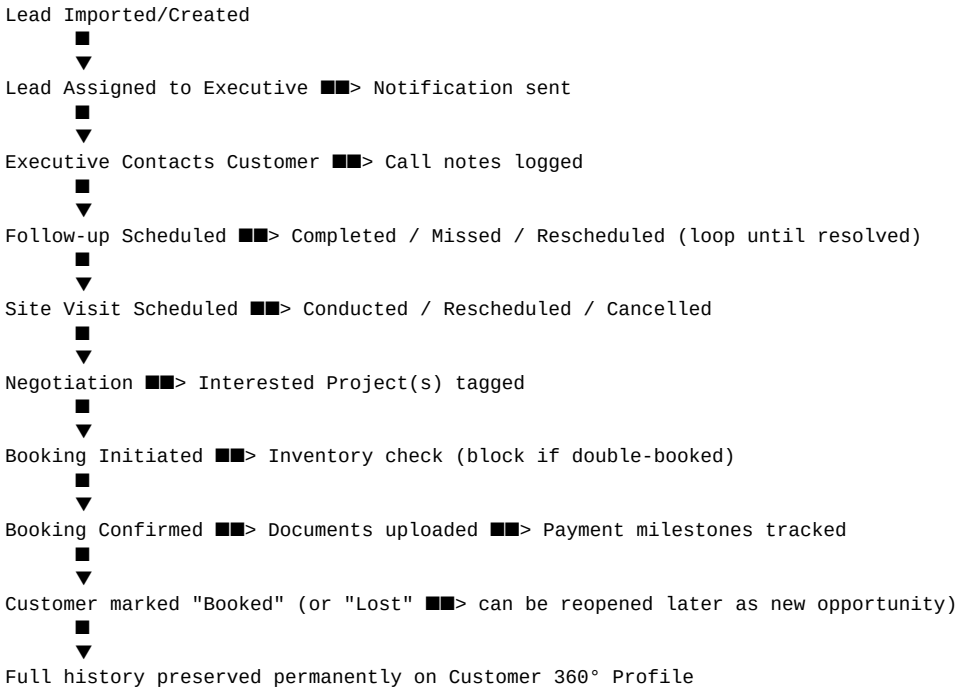
---

10. Security & Session Flow (Applies Throughout)

```
[Any Authenticated Screen]
   ■
   ■■■ Idle beyond timeout threshold ■■> Auto session expiry ■■> Redirect to Login
   ■■■ Action outside role permission ■■> UI element hidden/disabled + blocked server-side
   ■■■ Every critical action (create/edit/delete/status change) ■■> Written to Audit Log
   ■■■ Password stored encrypted; all traffic over secure authentication channel
```

---

11. End-to-End Lifecycle Summary (Single Customer Journey)



Notes

- This flow reflects the **MVP scope** defined in the PRD (Section 5) and the **edge cases** in Section 15.
- Screen-by-screen wireframes, field-level validation rules, and API contracts are not covered here — the source PRD notes these belong in a full 80–150 page enterprise specification.
